

# ENFORCER FX

Monitor & Speakers Optional

### Maximum Features... Maximum Performance !

Our Enforcer Gaming PCs with the AMD "Bulldozer" FX series processors are multi-tasking champions. Significant improvements in system responsiveness are possible because certain tasks can be off-loaded to specific cores. Users can now take on several tasks at once, such as rendering a video, playing games, or working on basic productivity software, because additional processor resources are free to handle other tasks.
